

BETON WIDE BAY TRUSS SCREED

- The BETON WIDE BAY Truss Screed can be extended in sections up to 40ft (12.20m)
- It can provide floor tolerance of plus or minus 3mm across the entire floor slab.
- Unique cast "A" Frame provides maximum structural strength.
- The all bolted construction eliminates weld failure.
- Easy to assemble and easy to align and easy to operate
- Powerful even Vibration across whole screed.
- Front Strike Blade is a "T" profile. Rear blade is "L" profile

Power Section Option	2.54 m, 1.32 m
Power Section Includes	Honda GX-270; 9HP, End Handles with Winches and cables
Other Section Length Options	2.54 m, 1.32 m, 0.71 m
Truss Width	0.38 m
Truss Height	0.40 m
Weight Per Meter	12 Kgs
Eccentric Vibration shaft speed	2800 RPM
Centrifugal force/unit length	220N/M @ 2800 RPM
